ABOUT
DAIRY YATRA

Explore India's Dairy Landscape. Experience Its Possibilities.

Dairy Yatra is a 15-day immersive learning journey from Tamil Nadu to Rajasthan, bringing together 40 fellows to explore India's diverse dairy ecosystem. Through field visits and interactions with progressive farmers, entrepreneurs, researchers, industry leaders, and institutions, fellows discover the practices, innovations, and business models shaping the future of dairy.

The journey unfolds through model farms, hands-on learning with practitioners, rural enterprises, grassroots innovations, and interactions with progressive farming communities.

THE YATRA EXPERIENCE

01

Learn by Seeing

Experience progressive dairy farms, explore scientific farming practices, and learn directly from those building successful dairy enterprises.

02

Connect with Ideas

Discover dairy businesses, cooperatives, research institutions, emerging technologies, and innovative business models across the value chain.

03

Aspire to Build

Turn field experiences into ideas for entrepreneurship, innovation, collaboration, and sustainable dairy livelihoods.

See the Sector. Meet Its Changemakers. Discover Your Place in the Future of Dairy.

HOST ORGANIZATIONS

01 Akshayakalpa Farm, Tiptur, Karnataka

The first stop will be at Akshayakalpa Farm in Tiptur, a leader in organic dairy farming. Known for its sustainable practices, Akshayakalpa focuses on chemical-free farming, ethical animal husbandry, and a direct farm-to-consumer model. Participants will see firsthand how organic milk production is transforming rural livelihoods and reducing environmental impact. They will also learn about innovative supply chain management and quality assurance techniques employed by the farm.

02 TMR Plant of Gokul Dairy, Kolhapur, Maharashtra

The journey will continue to the TMR Plant of Gokul Dairy in Kolhapur, a centre of technological innovation in dairy processing. Participants will gain insights into Total Mixed Ration (TMR) technology, which optimizes cattle nutrition through a specialized feed management system. This visit will highlight how Gokul Dairy has contributed to the advancement of dairy processing techniques to meet the increasing demand for high-quality milk and dairy products across India.

03 Amul Dairy, Anand

Amul Dairy, located in Anand, Gujarat, is India's leading dairy cooperative. Established in 1946, it revolutionized India's dairy industry through the White Revolution. Amul empowers millions of farmers by collecting and processing milk into high-quality dairy products. Its model promotes rural development, self-sufficiency, and innovation in the Indian dairy sector.

04 National Dairy Development Board (NDDB), Gujarat

National Dairy Development Board (NDDB) in Gujarat is one of India's leading institutions in dairy development, where participants will gain valuable insights. NDDB has played a crucial role in transforming the dairy sector through its cooperative model, empowering millions of farmers. This stop will highlight NDDB's contributions in cooperative management, policy advocacy, and technological innovations in milk production and processing.

05 Banas Dairy, Palanpur, Gujarat

Banas Dairy in Palanpur, Banaskantha, grew from a small society formed in 1960 into Asia's largest milk-producing cooperative. Participants will see how it turns cattle dung into bio-CNG and organic fertiliser, an approach that reduces methane emissions, cuts dependence on fossil fuels and creates an additional income stream for farmers.

06 ICAR-National Research Centre on Camel, Bikaner, Rajasthan

Participants will have the opportunity to visit the ICAR-National Research Centre on Camel in Bikaner, where they will explore camel dairy farming practices, research, and innovation.

07 Progressive Dairy Farmers Association (PDFA), Punjab

Founded in 1972, the Progressive Dairy Farmers Association brings together dairy farmers across Punjab. It organises the annual PDFA International Dairy & Agri Expo at Jagraon, Ludhiana, where milking and breed competitions, technical seminars and exhibits on breeding, nutrition, animal health and dairy equipment give participants a close look at progressive dairying.

08 ICAR-Central Institute for Research on Buffaloes (CIRB), Hisar, Haryana

Established in 1985, ICAR-CIRB is India's leading buffalo research institute. It maintains a pedigreed Murrah breeding herd and works on germplasm improvement, feeding systems, reproductive efficiency and health management. Participants will see how research is raising the productivity of buffaloes.

Glimpse of

the Journey.
